“let’s mimic”

BACKGROUND

It is important to ensure that human activities and occupations in the workplace are conducted in a sustainable and environmentally friendly manner. This entails modifying existing processes in personal consumption and traditional occupations as well as the development of new sectors of activity to replace environmentally unfriendly alternatives. By focusing on sustainability and environmental friendliness, we can work towards a more responsible and eco-conscious future.

LET'S MIMIC PROJECT

The “let’s mimic” project aims to enable VET systems to be more *sustainable* and *relevant*, supporting young people to obtain the skills they need to participate and prosper in achieving the sustainability goals.

KICK-OFF MEETING

The “let’s mimic” partners met in Bucharest on 11-12 March 2024 to discuss how to define the Biomimicry Process Design for Sustainability Skills, and how to develop the let's mimic Platform and the training modules.

Partners have shared ideas on how to author the project's results, such as constructing the Learning outcomes Matrix for Sustainability Skills in VET learners, the project-based learning framework for sustainability skills through the biomimicry process design, and the self-learning kit for VET students.

PARTNERSHIP

- PANEPISTIMIO THESSALIAS
- ADVANCED TECHNOLOGY SYSTEMS SRL
- Yakacik Mesleki Ve Teknik Anadolu Lisesi
- Etudes Et Chantiers Corsica
- INSTITUTO PARA EL FOMENTO DEL DESARROLLO Y LA FORMACION SL
- VIRTUAL CAMPUS LDA
