

NEWSLETTER II

3RD CONSORTIUM MEETING

The 3rd consortium meeting was organised by the University of Thessaly in Volos, Greece on April 10 – 11, 2025, with the participation of all project partners.

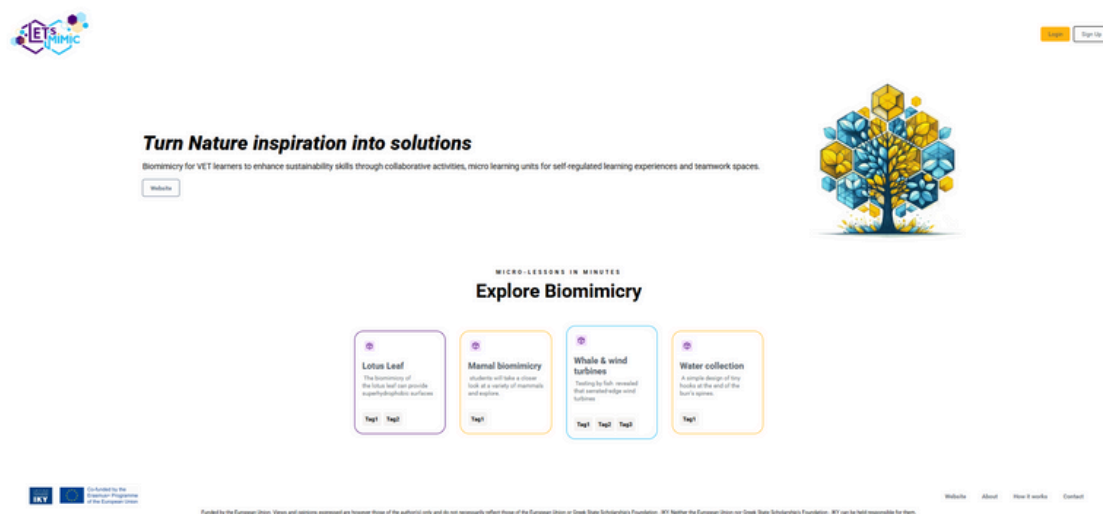

The meeting took place in hybrid mode. It provided an excellent opportunity to collaborate closely on the project implementation, including the LET's MIMIC biomimicry learning design, the self-regulated learning kit, the biomimicry training modules, the digital learning platform, and other interventions.

Partners further made plans for future implementation, including piloting activities with students and educators, capacity building, and multiplier events.

LET'S MIMIC PLATFORM

The biomimicry platform is currently being developed. The Let's Mimic innovative digital learning platform aims to support student team collaboration on applying biomimicry to address modern sustainability challenges.

The platform integrates the design introduced in work package 2 with the 6 digital modules: the Microlearning Module, the Teamwork Module, the Self-regulated Learning Kit, the Gamification Module, the Assessment Module, and the User management Module.
