

NEWSLETTER III

LET'S MIMIC PLATFORM

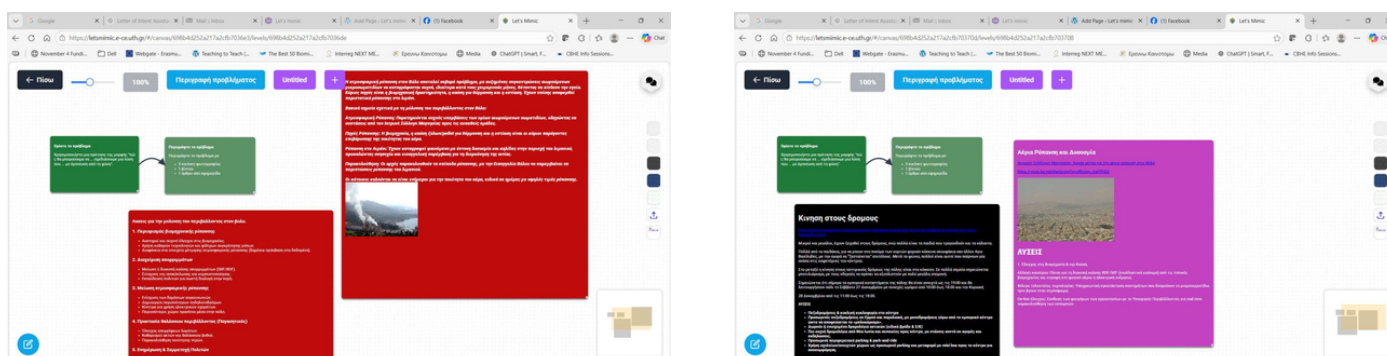

The biomimicry platform is ready for use. The Let's Mimic innovative digital learning platform supports student team collaboration on applying biomimicry to address modern sustainability challenges.

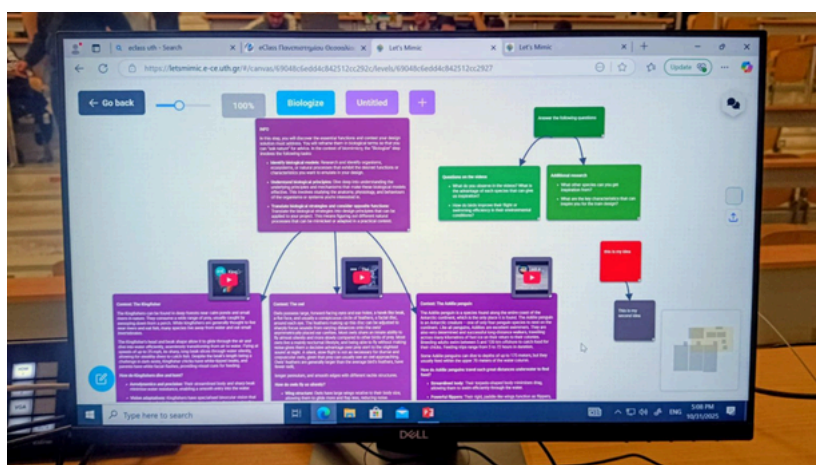

Co-funded by
the European Union

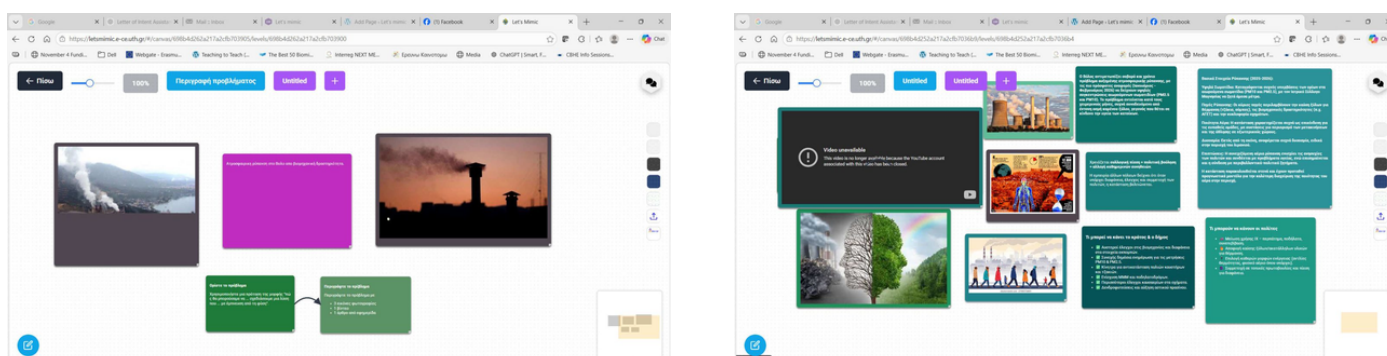

The platform already contains 70 challenges and solutions, 70 case studies, as well as 10 training modules, all available in english, french, greek, spanish, portuguese, turkish and romanian.

Students applied biomimicry concepts, steps, and approaches to develop solutions inspired by nature that help address modern sustainability challenges, such as reducing air pollution, addressing plastic pollution, supporting biodiversity, designing green cities, and mitigating natural disasters stemming from climate change.

Students worked collaboratively in teams within formal projects that contributed to the final student grade for the course. Student inquiry, collaboration, and solution synthesis will be guided through LET's MIMIC resources, including the Self-Regulated Learning Kit, Training Modules, and the Biomimicry Digital Learning Platform.

PLATFORM TECHNICAL GUIDE

The Let's Mimic platform is designed to create interactive, engaging, and enjoyable learning experiences. Project partners have created:

- a guide to support teachers in navigating and utilising the platform's features confidently and efficiently.
- a guide to help students understand how to use the platform confidently, from signing up and logging in to exploring exciting features.
